

Date of birth: December 5, 1989
Place of birth: Nicosia, Cyprus
Nationality: Cypriot

Profile

My name is Marios Stylianou, I'm from Cyprus and over the last years I live in Milan. I define myself as a highly motivated person, creative and with an innovative mindset, always positive, full of energy and impatient to share my ideas, but still ready to challenge them! That's how I have set myself in both working and private context: always in search of continuous improvement.

Through my university and work experience I have learned to work both in group and in autonomy, always with responsibility, commitment and precision. My experience as a military officer instead, taught me discipline and how to transmit it with respect and enthusiasm to all the other people for whom I was responsible.
